Key Insights

Nigeria's electricity access grew from 27% in 1990 to 61% in 2023 a 34% improvement over 30 years. However, over 90 million Nigerians remain without power. The South West leads with 63% access while the North East lags at just 26%. Power consumption peaked at 219 kWh per capita in 2016 before dropping sharply, reflecting grid instability and distribution losses averaging 29% across all DISCOs.
